

KazoOS Startup Foundation Documents

Version: 0.1

Purpose: Define the strategic foundation for KazoOS, an AI-powered Business Operating System for African SMEs, beginning with an AI Marketing Department.

Executive Summary

- KazoOS aims to become the AI Business Operating System for African SMEs.
- Initial wedge: AI Marketing Department that creates an entire month's marketing strategy and assets in under 10 minutes.
- Long-term vision: AI departments for Marketing, Sales, Customer Support, Finance, HR and Operations.

Company Vision & Mission

- Vision: Every African business should have access to enterprise-grade AI employees.
- Mission: Help SMEs grow revenue by automating high-value business functions, starting with marketing.

Core values: Customer obsession, simplicity, measurable outcomes, trust, African-first design.

1. Product Vision – Why KazoOS Exists

Mission

To give every African business access to world-class AI employees that help them grow, starting with marketing.

Vision

Become Africa's leading AI Business Operating System where every SME can activate AI departments instead of hiring entire teams.

Problem

SMEs struggle with consistent, effective marketing due to limited time, skills, and budget.

Value Proposition

Create and manage a month's worth of high-quality marketing content in under 10 minutes while acting like an experienced marketing department.

2. Product Requirements Document (PRD) – MVP v1

Goal

Enable businesses to generate a complete 30-day marketing plan quickly.

Core Features

- Business onboarding
- AI business profile creation
- 30-day marketing strategy

- Content calendar
- AI-generated captions
- AI-generated graphics
- Hashtag and CTA recommendations
- Approval workflow
- Export/download
- Optional social publishing integrations

Success Metrics

- Time to first campaign <10 minutes
- Monthly plan approval rate
- Customer retention
- Weekly active users

3. User Personas

Persona 1 – Fashion Boutique Owner

Needs daily social media content to drive sales.

Persona 2 – Restaurant Owner

Needs promotions, menu highlights, and customer engagement.

Persona 3 – Healthcare Clinic

Needs educational posts, appointment reminders, and trust-building content.

4. Customer Journey Map

Discover KazoOS → Sign Up → Business Setup → AI learns business → Generates strategy → Reviews monthly calendar → Approves content → Downloads or publishes → Reviews performance.

5. Information Architecture

Landing Page

Authentication

Onboarding

Dashboard

Marketing Calendar

Content Library

Campaigns

Brand Assets

Settings

Billing

Help Center

6. Database & AI Knowledge Model

Business Profile

Brand Identity

Products & Services

Target Audience

Locations

Business Goals

Competitors

Social Accounts

Content History

Campaign Performance

Knowledge Base

AI Memory Layer for business preferences and brand voice.

7. Technical Architecture

Frontend

- Next.js

Backend

- FastAPI (Python)

Database

- PostgreSQL + pgvector

Storage

- Object storage for assets

AI Layer

- LLM APIs
